

• *VB-FullAir*

The Mercedes-Benz Sprinter 5,0 T 4x4

with VB-FullAir rear axle air suspension

Mercedes-Benz Sprinter 5,0 T 4x4 also available with VB-FullAir rear axle air suspension

The Mercedes-Benz Sprinter 5,0 T 4x4 is available with rear axle air suspension. The Sprinter is extremely suited for the use of airsuspension systems. Our VB-FullAir-2C airsuspension is available for new and used cars. The newly developed rear axle air suspension, from the Dutch company VB-Airsuspension, is available as an after-market option through the Mercedes-Benz network.

The electronic part of the rear axle airsuspension is compatible with the vehicle's main electrical system. Various software variants create the possibility to adapt the VB-FullAir-2C airsuspension to the specific use of the vehicle.

Air-suspended Sprinters will be supplied and serviced by the Mercedes-Benz dealer organisation.

Mercedes-Benz Sprinter will be used for a wide range of individual needs and market circumstances where air suspension is essential. For example: passenger transport, disabled persons transport, rescue vehicles, motor-homes, car transporters and transport of shock sensitive products. For these and more usages, and individual needs, our VB-FullAir 2-C airsuspension is the right solution.
