PRODUCT SHEET

# PRODUCT SHEET

## All under control

The VB-FullAir air-suspension systems have a comprehensive control panel, so you have all the functions of the air-suspension “under control”.

## Versatile

The VB-FullAir systems are extremely versatile and provide comfort in all situations.

**AutoLevel**  
**OffRoad**  
**Waste drainage**  
**Garage**

**Ferry**  
**Parking**  
**Manual raising**  
**Manual lowering**

**VB-FullAir X4**

**AL-KO**  
QUALITY FOR LIFE

### AUTO LEVEL

A perfectly horizontal plane at the touch of a button: made possible by the integrated digital level.

### FERRY

Raises the rear end as far as possible to make driving onto ferry ramps easier, for example.

### OFF ROAD

The vehicle is raised to the maximum possible height to achieve ground clearance on uneven terrain.

### PARKING

Lowers the height of the vehicle as far as possible to make entering and exiting the vehicle easier.

### WASTE DRAINAGE

Tips the vehicle towards the side of the waste pipes to ensure the waste tanks are completely empty.

### MANUAL

Independent height adjustment through individual control of the air suspension on the front and rear axle.

### GARAGE

To ensure easy loading of the rear garage, the front axle is raised automatically and the rear end lowered as far as possible.

## Strong partners

AL-KO choose air suspension systems from VB-Airsuspension – for increased comfort and optimum driving dynamics in all situations.
