PRODUCT SHEET

PRODUCT SHEET

All under control

The VB-FullAir air-suspension systems have a comprehensive control panel, so you have all the functions of the air-suspension “under control”.

Versatile

The VB-FullAir systems are highly versatile and provide outstanding comfort in any situation.

AutoLevel

OffRoad

Water drain

Garage

Ferry

Parking

Manual raising

Manual lowering

VB-FullAir 4C

AUTO LEVEL

This option includes a digital levelling function which can set your vehicle level (as far as the spring travel permits) at the touch of a button.

OFF ROAD

The vehicle is raised to the maximum possible height to achieve ground clearance on uneven terrain.

WATER DRAIN

Tips the vehicle towards the side of the waste pipes to ensure the waste tanks are completely empty.

GARAGE

To ensure easy loading of the rear garage, the front axle is raised automatically and the rear end lowered as far as possible.

FERRY

Raises the rear end as far as possible to make driving onto ferry ramps easier, for example.

PARKING

Lowers the height of the vehicle as far as possible to make entering and exiting the vehicle easier.

MANUAL

Independent height adjustment through individual control of the air suspension on the front and rear axle.

Strong partners

Our partners choose air suspension systems from VB-Airsuspension – for increased comfort and optimum driving dynamics in all situations.
